

# EXECUTIVE PROSPECTUS — STRATEGIC AI INFRASTRUCTURE PORTFOLIO

CONFIDENTIAL — FOR STRATEGIC REVIEW

## NATIONAL AI PORTFOLIO

Strategic domain portfolio aligned with the emerging infrastructure layers of artificial intelligence.

## FOCUS AREAS

- Sovereign AI infrastructure
- Compute and energy-backed systems
- AI control layers and identity
- Next-generation digital infrastructure

## PORTFOLIO ANCHOR

NationalAINeural.com — System-level identity for sovereign AI infrastructure.

This domain represents the control and identity layer of national-scale AI systems, aligned with long-term infrastructure development across compute, energy, and deployment environments.

## PORTFOLIO STRUCTURE

### Identity Layer

- NationalAINeural.com

### Core Infrastructure Layer

- NationalAIInfrastructure.com

## STRATEGIC POSITIONING

Artificial intelligence is transitioning from software to infrastructure. Control over AI systems, compute environments, and energy inputs is becoming a national priority. This portfolio reflects that shift by mapping directly to how AI systems will be structured at national scale. Each domain aligns with a specific infrastructure layer, forming a coordinated system rather than a collection of standalone assets.

## **ACQUISITION**

Primary asset available individually. Portfolio-level acquisition available for strategic buyers.

### **Primary Asset (NationalAI Neural.com)**

Target Range: \$90,000 – \$185,000+

Seller Anchor: \$150,000

Expected Close: \$110,000 – \$150,000

Portfolio pricing available upon request and may include structured acquisition options.
